

Decision Dynamics Framework

Team Dynamics — Participant Survey

Post-Simulation | Anonymous | Approx. 3 minutes

Instructions

This survey captures your experience of how your team worked together during the simulation. There are no right or wrong answers. Your responses are anonymous and will be used alongside team transcripts to produce a Decision Dynamics Index (DDI) report — a diagnostic showing how team behaviour influenced decision quality.

Please respond based on what actually happened, not what you think should have happened.

SECTION 1 — DECISION STRUCTURE & PROGRESS

1. When new information emerged mid-simulation, our team was able to incorporate it and keep moving without losing significant time.

☒ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	--------------------------------	-------------------------------	-----------------------------	--------------------------------------

2. Our team adjusted the pace of decision-making appropriately — moving faster when time was critical and slowing down when the situation required more thought.

☒ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	--------------------------------	-------------------------------	-----------------------------	--------------------------------------

3. Before working through decisions, our team established a clear approach or sequence for how we would proceed.

☒ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	--------------------------------	-------------------------------	-----------------------------	--------------------------------------

SECTION 2 — FOCUS UNDER PRESSURE

4. Under time pressure, the team's instinct was to slow down and prioritise before acting.

☒ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	--------------------------------	-------------------------------	-----------------------------	--------------------------------------

5. Decisions were made after the team had a sufficient shared understanding of the situation.

☒ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	--------------------------------	-------------------------------	-----------------------------	--------------------------------------

6. When something went wrong or did not go to plan, the team regrouped and found a way forward without significant disruption.

☐ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	-----------------------------------	----------------------------------	--------------------------------	---

SECTION 3 — ALIGNMENT & COLLECTIVE COMMITMENT

7. Once a decision was made, the team moved into execution — adjusting and refining as needed, rather than reopening the original call.

☐ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	-----------------------------------	----------------------------------	--------------------------------	---

8. Input from quieter or less senior members visibly shaped the direction of our decisions.

☐ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	-----------------------------------	----------------------------------	--------------------------------	---

9. Team members checked that others were aligned before moving to the next decision.

☐ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	-----------------------------------	----------------------------------	--------------------------------	---

SECTION 4 — DIRECTION & EXPERTISE ACTIVATION

10. When a decision required specific expertise, the person with that knowledge took the lead — regardless of their formal role.

☐ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	-----------------------------------	----------------------------------	--------------------------------	---

11. When our discussion drifted or ran over, someone in the team named it and redirected the group.

☐ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	-----------------------------------	----------------------------------	--------------------------------	---

12. Team members who spoke less frequently were actively invited to contribute during discussions.

☐ Strongly disagree	☐ Disagree	☐ Neutral	☐ Agree	☐ Strongly agree
--	-----------------------------------	----------------------------------	--------------------------------	---

SECTION 5 — OPEN REFLECTION

13. What one thing did your team do particularly well in how it made decisions today?

14. If you ran this simulation again tomorrow, what one change in how your team operates would most improve your result?

How your responses are used

Your responses are combined with your team's simulation transcript to generate a DDI report. No individual responses are attributed. The report reflects team-level patterns only.
